

Accident Guide

Carport accidents can happen, and when they do M Bar C Construction can help.

First, contact us. What's next?

Safety First

Call 911 if there is an injury or immediate threat to pedestrians or the public near the damaged structure

Inspect the area- make sure the scene is safe to approach

Restrict access- immediately secure the area with caution tape or barricades and preserve it as is

Items to look for that indicate structural failure or immediate danger:

- Cracked, dislodged solar panels
- Hanging or out-of-place metal framing or sheathing
- Hanging, damaged, or unsupported equipment

Repair Services

Steel structure and carport repairs

Who We Are

M Bar C Construction is Dedicated to Delivering Superior Carport Installations

M Bar C was developed to serve the increasing demands of commercial, government, and industrial customers with a variety of services, including solar & non-solar shade structures, DSA Approved canopy solutions, and custom shade installations.

Let Us Help

Unfortunately, accidents are inevitable. The good news is, we can help.

M Bar C Construction repair support solves carport and steel shade structure issues, including automobile impacts, handling insurance claim resolutions, aesthetic cosmetic damage, natural disaster damage, and more.

Trust The Experts

Whether or not M Bar C Construction initially installed your carport installation, we can assess your steel structure and carport repair needs and restore the integrity of your structure.

M Bar C Construction takes carport and steel structure repairs work just as seriously as we take initial installations. As structure design and installation experts, M Bar C is ready to support you in preserving and repairing the integrity of your asset from the very beginning and beyond
